

MAISONETTE ON MADISON

DESIGN PRESENTATION

Maisonette On Madison was inspired by elevated ease and warm refinement. A blended mix of natural materials, soft textures and muted patterns. Boasting over 3,000 sq/ft., the duplexes were designed through a thoughtful, unique and holistic approach aimed to bring authenticity to this new build while crafting an environment that suits a modern-day lifestyle.

Employing textural earthy palettes that transition like seasons, designs are elegant, minimal and timeless. Telling a narrative with each space, we carefully curated designs that balance functionality, warmth and comfort.

The goal was to remain luxurious, livable and above all else, personal.
